The Combination Door Company

Interior Doors

Today's home architecture calls for a variety of wood species and designs to complement the interior décor. The Combination Door Company creates stile and rail raised panel doors, flat panel doors and french doors to meet discriminating tastes.

Wood Species

The natural light color of maple, the bold grain of plain sliced red oak, the rich reddish-brown hues of cherry, the stainability of birch and the rustic appearance of hickory provides the variety of wood species to complement today's home decors.

History

CDC has a long tradition of door manufacturing history. Founded in 1912 by L.C. Schmidt, CDC produces interior and exterior door products in their 97,000 square manufacturing plant in Fond du Lac, Wisconsin. Distribution is nationwide.

Quality

The long tradition of manufacturing at CDC produces the highest quality and carefully detailed door product. Each door component is inspected through step by step machining and assembly processes. Every effort is used to assure complete customer satisfaction.

Specifications

Flat panel doors feature 3/8" thick veneered select grade panels and square shaker style sticking. Raised panel doors are 3/4" thick membrane pressed concave panels with beaded oval striking. Stiles and rails are joined with hardwood dowel construction. A wide variety of door widths and heights are available. Standard door thickness is 1-3/8", with optional 1-3/4".

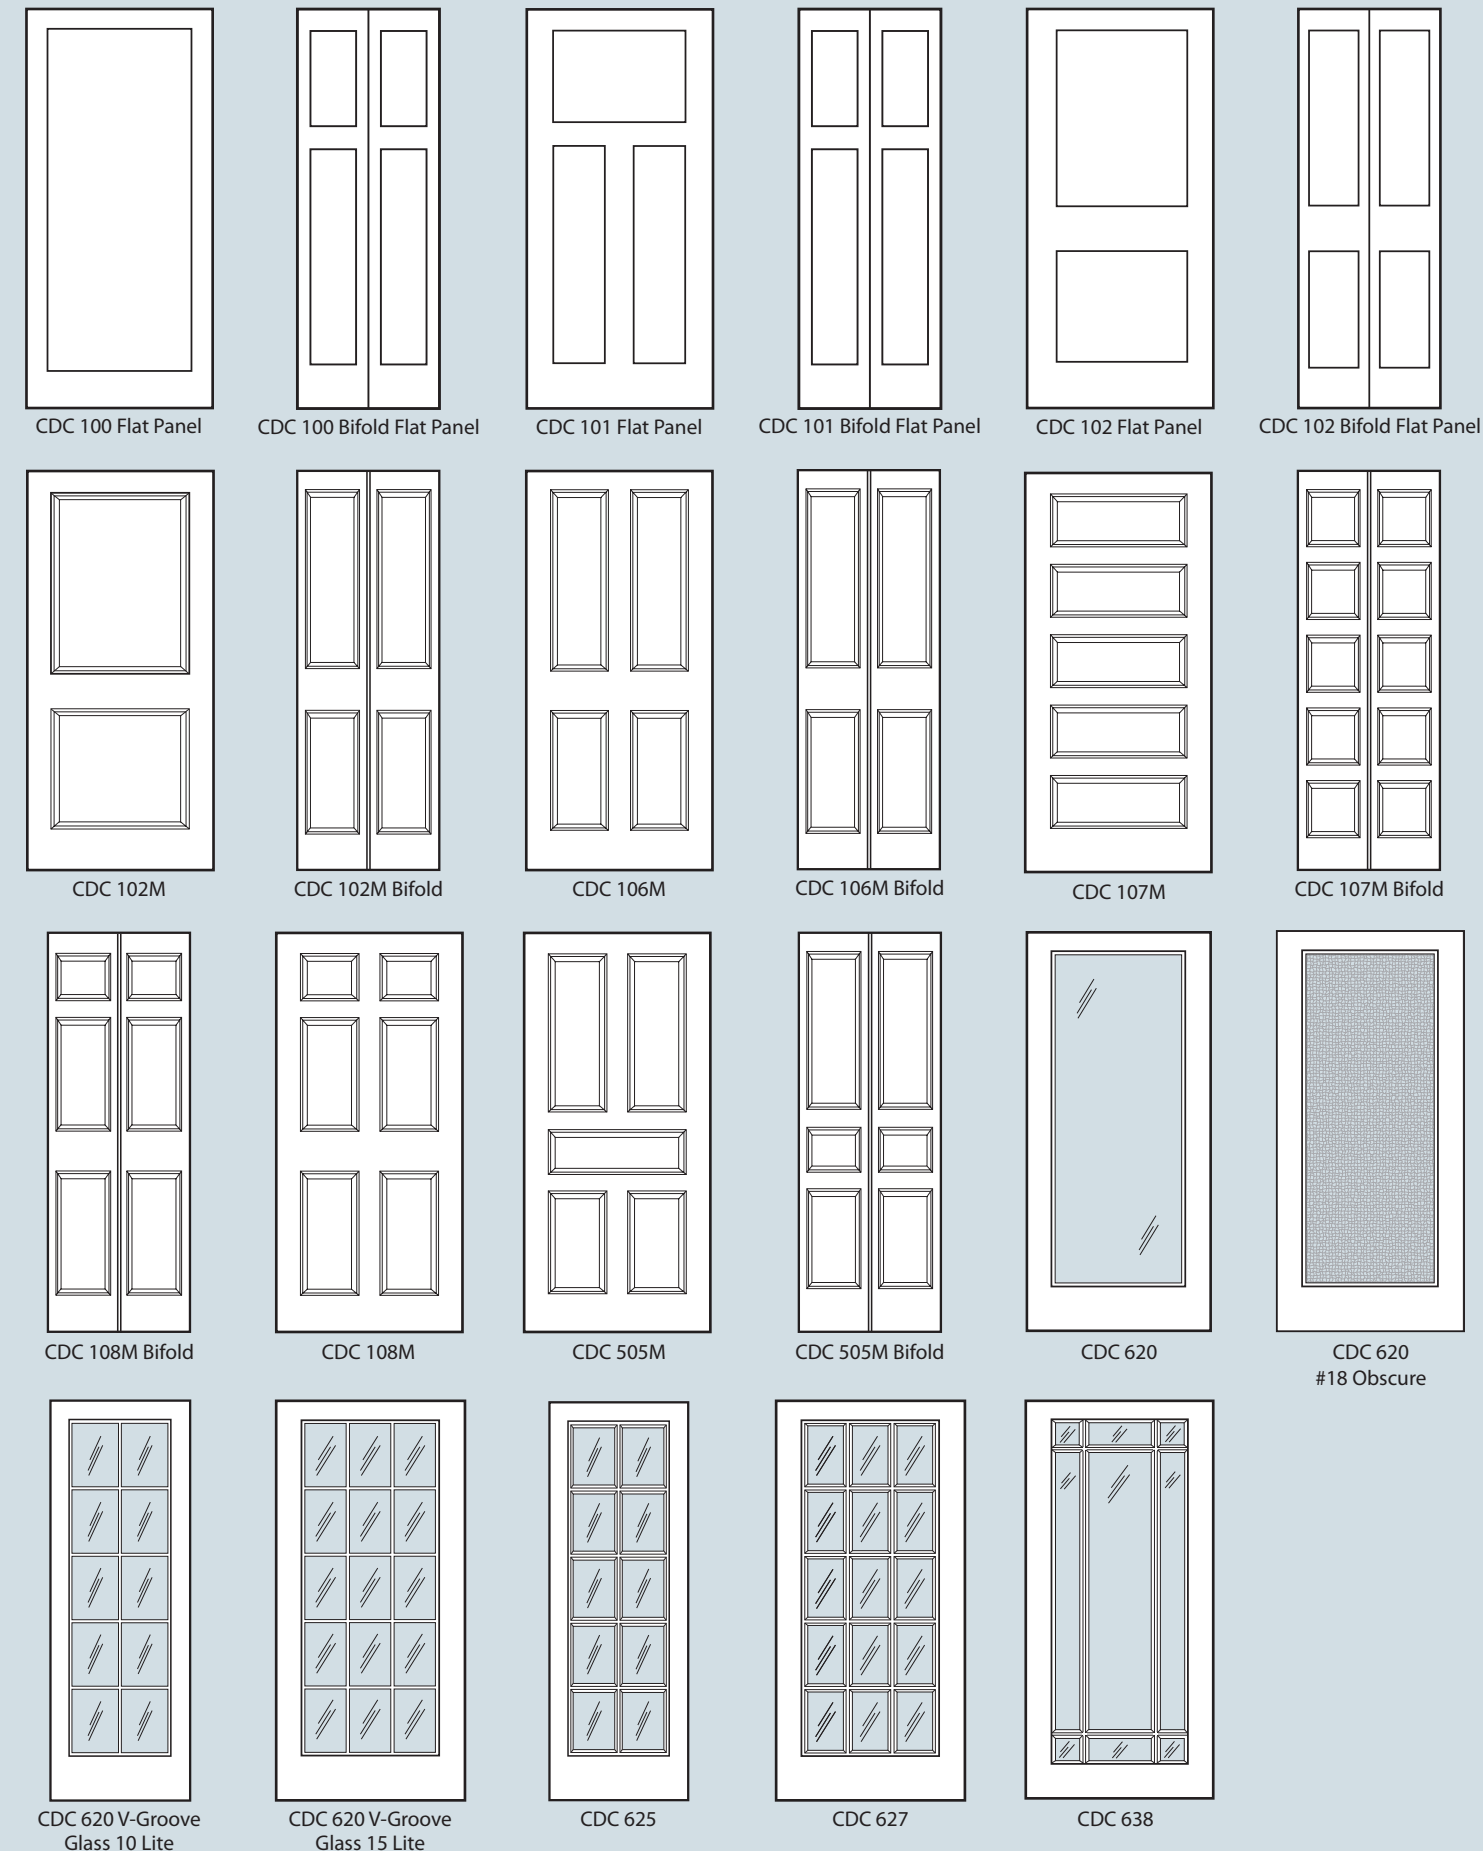

Warranty

CDC warrants their doors to be free of defects in materials and workmanship for 5 years. For a complete copy of our warranty please contact your distributor.

Custom Sizes and Designs

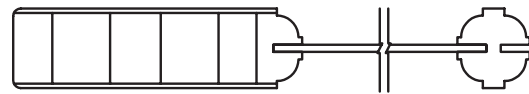

CDC offers unlimited designs and custom products through their specials department. Circle and arch top doors complete with jambs and trim are but a few of the possibilities. Cad design drawings are provided to confirm those extra special details. French doors have a wide range of special order glass patterns available.
